Of the Eclipses this Year. 1693.

There will be four Eclipses this Year, two of the Sun, and two of the Moon, but neither of them will be visible to us here in *New England*.

The first is of the Moon, which falls on *May 18* at half an hour past 6 in the morning, in 7 degrees of *Sagittarius*, the place of the great Conjunction 1603. The Second will be of the Sun, on the first of *June*, at noon, in 21 degrees of *Gemini*, the Ascendant of *London*, but not Eclipsed to us, by reason of the Moons South Latitude. The Third will be of the Moon, on *November* the 10th. at 23 min. past 2 afternoon, in 28 degrees of *Taurus*, near the *Pleiades*. The Last will be of the Sun, on the 25th of *November*, at half an hour past 11 at night in 14 degrees of *Sagittarius*, near the place of the Conjunction of *Saturn* and *Jupiter*, 1663. There is also a Remarkable Opposition of *Saturn* and *Mars* this Year, *Saturn* being in 8 degrees of *Capricornus*, and *Mars* in 8 degrees of *Cancer*; it happens on the 12th of *August*. In this Year also, *Saturn* and *Jupiter* makes their first Trine from *Capricornus* and *Virgo*. *Saturn* being in 8 8 of *Capricornus*, and *Jupiter* in 8 8 of *Virgo*. Perhaps this Trine were it not for the weakness of *Jupiter*, might produce Peace to the World, there may be great Meetings and Treaties for Peace, but the strength of *Saturn*, and the Conjunctions

Conjunctions of Saturn and Mars in Capricornus, may hinder the good design of Jupiter

Of the Four Quarters of the Year. 1694.

THe Winter quart. begins when the ☉ enters into *Capric.* Decem. 11th. 1694. at 12 min. past 3 in the morn. the sign *Leo*, being on the mid heaven, & *Scor.* upon the Ascendant A, there are no less then 6 conjunctions of the planets in this month of *Decem.* 1694. For 1st. on the 7 day there is a conjunction of ☿ & ♀ in 4 degrees of *capric.* and on the 9 day between the new moon and the ingress happeneth a ☿ of ♀ & ☿ in 6 degrees of *capric.* & on the 11 day there is a Conjunction of the Sun and Mercury in the first degree of *Capric.* & on the 16 day there is conjunction of *venus* & *mercury* in 24 degr. of *Sagittarius*: and on the 17 day there is a Conjunction of Saturn and the Sun in 6 degrees of *Capricorn*, and on the 24 day there is a Conjunction of Saturn and Venus in 7 degrees of *Capricorn*: It hath been observed, that after the Conjunction of Saturn, Mars and Mercury, some notorious Plot hath broke out; At the time of the New Moon to us here in *New-England*, before the ingress, the Conjunction happens in the tenth house, but in *England* near the West Angle at the new moon, and all the Planets under the Earth, which may denote that all the present Transactions as well good as bad, are very close, and managed with much secrecy

secrecy ; that there are great Councils in hand and wise heads to guide and direct them ; that several Offenders are detected, and some great man or men make their Exit, &c. As to the Weather in this Quarter, it may prove variable, inclining often to Snow or Rain, or both, and not very cold to hold it long together.

Of the Spring Quarter. 1695

The Spring Quarter begins when the Sun enters Aries, which this year is on the 10th of March 24 min. past 2 in the morning, at which time, and also at the new moon preceeding, the Ingress finding the Planets essentially strong, Saturn, Jupiter and Mars, the three Superiours, it may be conjectured, that as the Moon and other Planets come to be Aspected with them, we may expect various sorts of weather, according to the nature of the Planets, and the signs they are in, which 'tis to be hoped may prove a dripping Spring, and so consequently a fruitful year, which God in mercy grant.

Of the Summer Quarter.

The Summer Quarter begins when the Sun enters Cancer, which happens this Year, on June the 11th at 24 min. past 4 in the morning, perhaps there may be no great want of Rain also in this quarter, if it should be much inclined to Thunder Showers.

Of the Autumn Quarter.

The Autumn Quarter begins when the Sun enters Libra, which happens this Year on

September

September the 12th, 48 min. past 8 at night.
This Quarter perhaps may not only prove
something moist, but also pretty cold & win-
dy, especially in November and December.

*An Account of the Cruelty of the Papists acted upon
the Bodies of some of the Godly Martyrs.*

I. **J**OHAN WICKLEIF Parson of *Lutterworth*,
in *Leicester-shire*, was a Learned, Pious,
Painful Preacher of Gods Word, brought up
in the University of *Oxford*, and admired of
all for his profound Learning: He stoutly op-
posed the Pope, and by many undeniable Ar-
guments proved him to be Antichrist. He
confuted and condemned his Doctrine about
Bulls, Indulgencies, &c. for which he was ha-
ted and persecuted by the Bishops of those
times; but by the favour of King *Edward* the
Third (in whose time he lived) and *John* of
Gaunt, he weathered it out; afterwards in the
Reign of *Richard* the Second, he was by the
power of his adversaries banished, yet returned
he again from Exile, and dyed in peace at
Lutterworth afore said. But in the year 1428.
which was forty one years after his Death, his
Dead Body was by the Decree of Pope *Mar-*
tin the Fifth, and Council of *Sene*, digg'd up
and burned, with the Execration of that Fiery
Pope.

*And thus went out this Lamp of Light,
Who 'gainst the Pope fought a good fight.*

2. *John*

The Cruelty of the Papists.

2. *John Hooper* was Student and Graduate in the University of *Oxford*, where he so profited in the knowledge of the Scripture, as made him altogether averse to Popery; the Devil hereupon raised him up many Enemies, so that for his safety he was forced to fly into *France*, from whence he Travelled into *Germany*; but hearing that King *Edward* the Sixth was come to the Crown, he returned into *England*, and was by King *Edward* made first Bishop of *Glocester*, and then of *Worcester*: In which Office he behaved himself so uprightly and inoffensively, that his Enemies had nothing to say against him. In the beginning of Queen *Marys* days, he was sent for by a Pursivant to *London*, and though he had opportunity, and was perswaded by his Friends to fly, yet he refused, saying, *Once I did fly, but now being called to this place and vocation, I am resolved to stay, and to Live and Dye with my Sheep.* By *Winchester* when he came to *London*, he was railed upon and committed to the Fleet, where after much hard usage, he was condemned to the Fire, which he patiently endured, refusing a Pardon that was set before him. One of his sayings was this, *There is neither felicity nor adversity of this world that is great, if it be weighed with the Joyes and Pains of the world to come.*

3. *Thomas Cranmer* was by birth of *Lincolnshire*, and brought up in *Jesús Colledge* in *Cambridge*, a Man of a meek Spirit, and pro-

found Learning. His first rile to Preferment was by reason of a Courtier and his conversing together about the Divorce between King Henry the Eighth and Katherine his Wite; Cranmer maintaining that the readiest way for the King to attain his desire, was no longer to trace the Labyrinths of the Popes proceedings, but directly to prove it unlawful by the Word of God. This being brought to the Kings Ear, Cranmer is sent for, and imployed to the most principal Universities in Europe, there publickly to maintain the truth of his Assertions, which he did so powerfully, that after his return, he was for his pains rewarded with the Arch-Bishoprick of Canterbury, which he quietly possesse during the Reigns of King Henry 8 and Edward 6. but Queen Mary coming to Reign (who set up again the Romish Idolatry) he was soon after by Gardiner the Spaniel, and Bonner the Blood bound brought into trouble, who never left worrying him till they brought him to the Stake, though upon hopes of a Pardon, he subscribed to a Recantation, for which when he came to burn, he thrust that which subscribed first into the fire, so that his hand died a Malefactor, and the rest of his Body a Martyr.

4. George Marston, a man eminent for his Piety, Learning and Religion; was one very conversant in the Scripture, by which he attained to a great perfection of knowledge therein,

therein, a rare matter in those times when Ignorance was taught to be the Mother of Devotion, and the reading of the Scripture made punishable, because it agreed not with the *Dagon* which the Pope had set up. But he was the more obnoxious to the Papists hatred, in that he taught and instructed others in the Principles of Religion, and shewing how far the Popes Doctrine differ'd from the Word of God. These things could not be long hid, for though it were out of *Bonnors* Diocels, it was not beyond the Popes reach, who had his setting Dogs in every corner, by whom this good man was apprehended, who standing still in defence of the Truth, was by them condemned to the fire, and burned in as barbarous a manner as cruelty could invent, having a Firkin of pitch, Rozin and Tar, placed in a Frame over his head, which melting down basted him, whilst the fire beneath roasted him, such cunning Cooks were the Popes emissaries to make a restorative dish for a languishing Religion.

A Cruelty beyond compare,

And such the Papists mercies are.

5. *John Huss* is supposed to have been born at *Prague* in *Bohemia*, and therein to have had his Education. It hapned whilst he was a Student there, that *Richard* the 2d. King of *England* married *Anne*, Sister to *VVincslaus* King of *Bohemia*, with whom came over ma-
